

## MAKING A FLOATING RAFT

To celebrate **Plastic Free July**, we have created a fun lockdown challenge just for you!

Can you make your very own **mini raft and watch it float**? Using materials you can find around your house and backyard try and put together a small raft that can float in your bath, sink or pool!

### Top tips

- ▶ **Wood floats!** Can you find any sticks or wooden items to help you?
- ▶ You might need to find something **sticky** to help hold your raft together

- ▶ **Test your materials** in small amounts of water to help you work out what floats!

Think about the **shape** you are creating – what shape are other things that float?

- ▶ Make it **pretty!** Add some colour or ribbons to make it look fun while it floats!
